### OVERVIEW

How often have you heard this in the staffroom? "Hooray! I love marking! It's quick and easy; pupils always read and react to my comments, and pay attention so they don't repeat their mistakes."

No, nor have we. So when the team at Just2 Easy came up with j2review, we were quick to snap it up for your LGfL subscription.

This training day is all about how you can use it to transform marking, monitoring, AfL and evidence gathering – for the better!

### WHO SHOULD ATTEND?

Whether you are a classroom teacher or senior leader, technician or computing coordinator, this one-day course will leave you with plenty of food for thought.

### WHAT IS J2REVIEW?

Students and teachers have unique j2e accounts for anytime, anywhere access. Photos and documents are instantly stored

to your account – no more hunting through trolleys of identical ipads for a piece of work.

The teacher has instant access to pupils' work, and only has to click on the speech bubble to give instant feedback. Built-in progression frameworks (and you can add your own, too!) enable one-click teacher assessment for each piece of work, too.

Pupils can share a piece of work with each other (or the class) at a click for peer marking via the same kind of learning conversations.

### WHAT WILL I LEARN?

- ✓ Setting up the j2e Tool Suite in your school and auto synch class lists/users
- ✓ Sharing files across devices and creating evidence portfolios
- ✓ Rationale, tips and techniques for effective AfL learning conversations
- ✓ Assigning statements to work according to assessment / progression frameworks
- ✓ Adding your own frameworks

### THE TRAINERS

#### DANNY YOUNG

is the founder and Managing Director of Just2Easy, the makers of the j2e Tool Suite.

For Danny, it's all about ensuring that teaching & learning drive

#### BOB USHER

Bob is the LGfL Content Manager, responsible for overseeing the strategy that informs which resources LGfL invests in on behalf of schools.

#### MARK BENTLEY

Based in the LGfL offices in New Malden, Mark works on the Content Team, sourcing, supporting and developing new learning resources across the Primary and Secondary curricula.
